MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 7

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 64 pages. OCLC Number: (OCoLC)74277799 Subject: Telecommunication -- United States -- Planning. Excerpt: . . . Appendix I: Briefing to the Staff of the Committee on Government Reform, House of Representatives, March 24, 2006 Objectives, Scope, and Methodology To identify sound transition planning practices against which agency planning efforts could be measured, we researched available literature on telecommunications transitions and held a series of interviews with individuals experienced in telecommunications transitions, including the prior transition to FTS2001. We met with industry experts from the Washington Management Group, Council for Excellence in Government, Federal Sources Inc. , and Gartner; telecommunications vendors such as Level3, MCI, and WilTel; and private sector companies such as CGI-AMS, Computer Sciences Corporation, Hewlett-Packard, and Allstate, which had just undergone its own telecommunications transition. We analyzed the results of these interviews to synthesize common themes and issues and identified five sound transition planning practices. Once compiled, we provided these practices to the four industry experts and FTS for comment and general agreement. To refine our approach and gauge the time required to assess each agency, we pretested our evaluation methodology at two agencies, the Administrative Office of the United States Courts and the Department of Housing and Urban Development. 6 Page 12 GAO-06-476 Telecommunications This item ships from La Vergne,TN. Paperback.
