

Linux System Administration

By Tom Adelstein, Bill Lubanovic, Falko Timme

O'Reilly Media, Inc, USA. Paperback. Book Condition: new. BRAND NEW PRINT ON DEMAND., Linux System Administration, Tom Adelstein, Bill Lubanovic, Falko Timme, If you're an experienced system administrator looking to acquire Linux skills, or a seasoned Linux user facing a new challenge, "Linux System Administration" offers practical knowledge for managing a complete range of Linux systems and servers. The book summarizes the steps you need to build everything from standalone SOHO hubs, web servers, and LAN servers to load-balanced clusters and servers consolidated through virtualization. Along the way, you'll learn about all of the tools you need to set up and maintain these working environments. Linux is now a standard corporate platform with users numbering in the hundreds of millions, and there is a definite shortage of talented administrators. "Linux System Administration" is ideal as an introduction to Linux for Unix veterans, MCSEs, and mainframe administrators, and as an advanced (and refresher) guide for existing Linux administrators who will want to jump into the middle of the book. Inside, you'll learn how to: set up a stand-alone Linux server; install, configure, maintain, and troubleshoot a DNS server using BIND; build an Internet server to manage sites, perform email and file...
